Quick Drying Time

Rough Touch® Scrubs™ in-a-Bucket

What are they? How do they work?

Rough Touch® Scrubs™ are a unique patented waterless hand-cleaning system. It combines a high-quality, liquid hand cleaner, and a heavy-duty, non-scratching, abrasive hand-cleaning towel. This patented towel construction is comprised of a polymeric non-woven soft layer, to which thousands of polymeric deep cleaning scrubbers are permanently bonded to one side of the surface. A special microperforation pattern is added to hold an effective liquid contaminate dissolving agent and soil lifters that dry quickly.

Who uses scrubs? And where?

Many workers wipe their hands up to 100 times a day without actually cleaning their hands. Rough Touch Scrubs can quickly disinfect hands of mechanics, technical service and industrial workers right on location.

How do scrubs compare to other products?

It is difficult to compare Rough Touch Scrubs due to their unique characteristics. Scrubs are used for cleaning hands, rather than inadequately wiping them with ordinary shop towels, paper towels, or rags. This is the ideal system for keeping hands professionally clean when soap and water are unavailable. Anywhere, anyplace, anytime.

What types of soil will rough touch scrubs actually remove?

Besides normal dirt and soils, Rough Touch Scrubs will remove "Icky-PIC", heavy grease, lubricants, adhesives, oils, tar, asphalt, inks, wax, coal dust, graphite and grass stains. Soils are absorbed into the patented towel and not re-transferred.

Other Uses, And Re-Uses?

Scrubs are especially effective for cleaning tools and machinery, as well as cleaning work surfaces. Scrubs can be used any way you might use shop rags or paper towels.

Are They Safe To The User?

Scrubs have been tested thoroughly in the field and have undergone independent laboratory testing. They are non-toxic, won't irritate skin and they do not require cautionary statements. Scrubs have a flash point in excess of 2000F, and an HMIS flammability rating of one. The polypropylene wiping material and canister are fully recyclable (contact your local agencies for details). Scrubs are USDA Authorized, and carry an E-4 rating.

Are Scrubs in-a-Bucket Economical to Use?

Yes. Scrubs serve as a very economical addition to any work environment. Significant time and labor savings are realized due to on-site, water-free hand cleaning. Scrubs can also be used to pick up oily spills. These benefits mean that this product becomes an extremely effective cost savings tool in relationship to other cleaning options.

Use to Clean

- Tools
- Painted Surfaces
- Tool Boxes
